

International Plant Protection Convention
Protecting the world's plant resources from pests

IPPC HUB Application

Release Notes

Release Version July 2018

INDEX

1. Fixes	3
2. Enhancements	3

1. Fixes

Reference	Description
1744	Displayed datetime not considering NPPO time zone setting in the admin console
1990	Log report attachment columns not correctly aligned with data
2272	Max length of the advanced acknowledge message to 200 characters. Extra characters will be truncated without returning error on the web service call

2. Enhancements

Reference	Description
2207	Advanced notifications groped into single email
2376	Documentation moved under the HUB console and versioned
1839	ePhyto XML Validation tool The validation of the ephyto can be used during the on-boarding process to validate that the produced XML comply with the ePhyto mapping of the UNCEFACT schema and harmonized codes. The validation tool is composed of additional User interface and web service functionalities to simplify the standardization of the ePhyto, including the harmonization codes, described more in details with the API Document
