Protecting the world's plant resources from pests

IPPC HUB Application

Release Notes

Release Version Nov 2019

INDEX

1 FIXES..... 3
2 ENHANCEMENTS..... 3

With this release the HUB WSDL has been changed with backward compatibility in the types definitions utilized in the web service operation *DeliverPhytoEnvelope*.

Updating the client proxy generated code will improve the client type definitions and help developers in producing a valid ePhyto envelope that will be delivered through the HUB, we suggest to update the client proxy and update the client code, existing client code will continue to work.

No changes have been introduced to all the other operations.

1 Fixes

Reference	Description
IHDS – 139	Seal number not included in the ephyto entity
IHDS – 140	Restructuring IncludedSPSConsignmentItem
IHDS – 141	Validation Tool: Incorrect warnings on the ReferenceSPSReferencedDocument
